WALL MAGAZINE

Acharya P.C. RAY
(2nd August, 1861 - 16th June, 1944)
Educationist

A large, colorful wall magazine with a red background. The central theme is 'PHARMACISTS AS ADVOCATES OF VACCINATION'. The magazine features various illustrations, including a caduceus, a pharmacist, a vaccine vial, and a person receiving a vaccine. Text elements include 'VACCINATION IS A SHOT OF LIFE', 'VACCINES - PROTECTING OUR FUTURE', 'PHARMACEUTICALS AS ADVOCATES OF VACCINATION', 'VACCINATION IS PROTECTION', and 'PHARMACEUTICALS AS PROTECTION'. The magazine is decorated with a string of yellow and red flowers and a red curtain on the left.

PHARMACISTS AS ADVOCATES OF VACCINATION

Behind every counter stands a guide,
With gentle strength they stand beside.
Not just with pills, but warmth and care,
They bring hope to hearts everywhere.

A drop, a dose, a healing art,
A vaccine given a hopeful start.
They heal the body, and guard belief,
turning worry into brief relief.

During hard times, they never rest,
Quiet heroes giving their best.
From every vial to every hand,
They spread hope across the land.

Through sleepless shifts and endless days,
They guide our hearts in quiet ways.
Not just with skill, but quiet care,
They spread a hope that fills the air.

Pharmacists - voices soft, yet strong,
Standing for right where fears go wrong.
Champions of trust, compassion, and care,
The true protectors - always there.

VACCINES

TO PROTECTING OUR FUTURE

You have a
POWER TO PROTECT
Against Vaccine Preventable Disease

IMPORTANCE OF VACCINATION

- Prevents deadly diseases.
- Protects vulnerable populations.
- Helps achieve herd immunity.
- Reduces Healthcare Costs.
- Contributes to global eradication of diseases.

A BRIEF HISTORY OF VACCINE

- 1796 Edward Jenner developed the Small pox vaccine.
- 1955 Jonas Salk introduced the polio vaccine.
- 1980 Smallpox declared eradicated.
- 2020 COVID-19 vaccines developed using mRNA technology.

COMMON VACCINES RECOMMENDED

- BCG - Tuberculosis
- DPT - Diphtheria, Pertussis, Tetanus
- MMR - Measles, Mumps, Rubella
- Hepatitis B
- HPV - Human Papilloma Virus
- COVID-19 - Corona Virus disease prevention.

"Vaccination: A Shot of Hope"

BCDA COLLEGE OF PHARMACY & TECHNOLOGY

Sattam Sahoo :: 3rd year :: B.Pharm

What Is

Vaccination?
vaccination is the process of administering a vaccine to stimulate the body's immune system to protect against a specific disease.

Why Vaccination Is

Important?

Prevents Diseases

Builds Community Immunity

Strengthens the Immune system

Reduces Healthcare Costs

Supports Global Health Goals

"Did You Know?"

- ✓ 1 pharmacist can vaccinate hundreds in a single day.
- ✓ Vaccines have eradicated smallpox and nearly eliminated polio.
- ✓ The WHO estimates vaccines save 5 million lives each year.

Pharmacists — The Unsung Heroes Of

Immunization

Educate & Counsel

Screen Patients

Store Properly

Administer Safely

Monitor & Record

Promote Awareness

Role of Youth /

Students (Pharmacists)

☀ **Youth and Students — The voice of change!**
Spreading awareness, inspiring communities, and breaking myths — they are the driving force behind a healthier tomorrow.

💊 **Pharmacists — The guardians of public health!**

From educating people to ensuring every vaccine is stored, administered, and monitored safely — they build the bridge between science and society, protecting lives one shot at a time.

∞ IN National Mission

- **UIP (Universal Immunization Programme):** Provides free vaccines to children and mothers.
- **Mission Indradhanush:** Aims for full immunization across the country.
 - Focuses on remote and rural areas.
 - Protects against major life-threatening diseases
 - IN Builds a healthier and safer India for all.

"Every vaccine brings us closer to a healthier, safer nation."

Possible Side Effects Of Vaccination & Their

Prevention

Common Side Effects:

- ❗ **Pain, redness, or swelling at the injection site.**
→ Apply a cold compress and keep the area clean.
- 😓 **Mild fever or tiredness.**
→ Drink plenty of fluids, rest well, and take paracetamol if needed.
- 😓 **Body ache or headache.**
→ Rest and stay hydrated.
- 😓 **Mild dizziness or fainting (rare)**
→ Sit or lie down for a few minutes after vaccination.

Myths vs Facts!

- ❑ **"Vaccines cause disease."** → False — they help your body build immunity safely.
- ❑ **"Healthy people don't need vaccines."** → False — everyone benefits from protection.
